

VERTILUX

VTi NEXUS BRIDGE

Powered by  bond

The **VTi Nexus Bridge** redefines smart home automation with unmatched compatibility, ease of use, and powerful performance.

6-800-HA-VTI03

FEATURES

Control a wide range of RF (Radio Frequency) devices:

- Unlike other hubs that require brand-specific bridges, the VTi Nexus Bridge consolidates control of up to 50 different RF devices into a single system.
- Support motorized shades, ceiling fans, fireplaces, and more.

Effortless Setup & User-Friendly App:

- Every VTi Nexus Bridge features a QR code for quick and easy setup. The intuitive app allows users to control and program scenes, timers, groups, and more with ease.

Seamless Smart Home Integration:

- Seamlessly integrates with all advanced automation and voice control systems, offering native integration and drivers for effortless smart home connectivity and streamlined integration.

Bidirectional Protocol Support:

- Specially designed for Relion Bidirectional Motors, providing real-time feedback on battery levels and shade positions for a superior user experience. Also compatible with Unidirectional motors.

Reliable Cloud & Local Control:

- Ensures uninterrupted operation with both cloud-based and local control, allowing functionality even when the internet is down.

Exceptional Signal Strength & Reliability:

- Boasts the strongest RF signal range (3,500 sq. ft.) in the market, covering large areas without the need for repeaters or multiple hubs.
